

High Powered Wireline Magnet

Product Overview

The High-Powered Wireline Magnet is designed to efficiently retrieve metallic debris from the wellbore following milling, perforating, or drilling operations. Its high-strength rare-earth magnets ensure maximum debris capture.

Why It's Used – Optimizing Wellbore Cleanliness

- Prevents equipment damage by removing ferrous debris.
- Reduces stuck pipe risks, ensuring smooth operations.
- Improves well efficiency after milling and perforation work.
- Minimizes intervention costs by avoiding expensive fishing jobs.

Key Features – Why Venturi's Magnet is Superior

- High-powered rare-earth magnets maximize debris retrieval.
- Compact, lightweight design for easy deployment.
- Durable construction for extreme environments.
- Simple design requiring no redress.

Item Number	Outer Diameter (in)	Make-Up Length (in)	Connection Type	Pull Force (lbs.)
0383-100A	1.000	6.00	5/8" Sucker Rod Pin	20 - 25
0383-150A	1.500	5.94	5/8" Sucker Rod Pin	90 - 95
0383-168A	1.688	6.00	5/8" Sucker Rod Pin	90 - 95
0383-184A	1.844	6.65	5/8" Sucker Rod Pin	120
0383-230A	2.300	6.13	5/8" Sucker Rod Pin	220
0383-250A	2.500	6.00	5/8" Sucker Rod Pin	260 - 270
0383-270A	2.700	8.13	5/8" Sucker Rod Pin	325 - 350
